DESIGN SYSTEM V1.0

Charnley Family Finance Tracker

A mobile-first, dark-mode personal financial management app.
Benchmarked against top Figma PFM templates (e.g., Money Manager Pro Finance Management Kit) and 2025/26 best practices.

DESIGN STYLE	PRIMARY FONT	GRID	CURRENCY
Dark Luxury · Mobile-first	Sora + DM Sans	8pt · 360px base	AUD \$

FOUNDATION · 01

Color System

A deep navy base with a signature pink accent and green for positive financial signals. Inspired by the Coinpay and iBank Figma kits — dark themes outperform light in PFM apps for nightly use and emotional engagement.

NAVY SCALE

Navy 950 #080C18	Navy 900 #0D1225	Navy 800 #111830	Navy 700 #18213E	Navy 600 #1E2A4A
Navy 300 #6278A0				

BRAND & SEMANTIC

Pink 500 #F0538A	Pink 400 #F56CA0	Green 500 #00C896	Green 400 #22D9A9	Amber 500 #F59E0B
Red 500 #EF4444				

SEMANTIC USAGE MAP

Pink 500 — Primary CTAs, active nav items, key interactions, highlights	Green 500 — Positive Income, savings, goals achieved, balance positive
Amber 500 — Warning Budget 70–99%, upcoming bills, caution states	Red 500 — Danger Budget exceeded, overdue bills, negative balance

Navy 800 — Card BG

All card surfaces, modals, drawers

Navy 950 — Page BG

GROCERIES · AUG 2025

--mono-lg

DM Mono 500 · 22px

+\$4,200.00

Key rule: All currency figures must use DM Mono. It ensures consistent character widths — columns align without jumping, and large numbers are instantly scannable. Tabular numbers are critical for financial UX trust.

FOUNDATION · 03

Spacing & Grid

8pt grid system. All spacing is a multiple of 4px. Touch targets minimum 44×44px (Apple HIG). Content max-width 360px on mobile, 760px on desktop.

--space-1	4px · micro
--space-2	8px · tight
--space-3	12px · compact
--space-4	16px · base
--space-6	24px · comfortable
--space-8	32px · section gap
--space-12	48px · large section
--space-16	64px · page padding

FOUNDATION · 04

Category Icons

Emoji-based icons on coloured pill backgrounds. Colour-coded by category type — spend categories get warm tones, income gets green, savings gets blue.

Save Transaction

Mobile keyboard tip: Use `type="number"` for amounts (launches number pad), `type="date"` for dates, `inputmode="decimal"` for decimal entry. This halves the time to add a transaction on mobile.

COMPONENTS · 04

Progress Bars

Traffic-light colouring: green (safe <70%), amber (caution 70–99%), red (exceeded 100%+). Used for budgets, savings goals, and mortgage LVR.

COMPONENTS · 06

Navigation

Bottom tab bar for mobile (5 items max). Active item highlighted with pink. Floating action button for primary "Add" action sits above the nav bar.

BOTTOM NAVIGATION

Navigation structure for your app: Home (Dashboard) → Transactions → [+ FAB] → Budget/Goals → More (Mortgage, Super, Bills, Settings). The FAB in the centre is the #1 pattern in top fintech apps (Monzo, Revolut, Up Bank).

SCREENS · 01

Mobile Screen Mockups

Three key screens: Dashboard, Budget, and Bills. All mobile-first at 360px base width. Desktop expands to a two-column layout.

Good morning 🙌

ANALYSIS · 01

Design Benchmark

How this design system compares to the top Figma PFM templates and leading consumer apps (Up Bank, Monzo, YNAB).

FEATURE / PATTERN	IBANK KIT	FINANCY KIT	UP BANK	THIS DESIGN
-------------------	-----------	-------------	---------	-------------

Dark mode first	△ optional	✓	△ optional	✓ native
8pt spacing grid	✓	✓	✓	✓
Tabular mono for amounts	✗	△ partial	✓	✓ DM Mono
Traffic-light budget colours	△ partial	✓	✓	✓
Floating action button	✓	✓	✓	✓
Bottom tab navigation	✓	✓	✓	✓ 5 tabs
Greeting personalisation	✗	△ name only	✓	✓ + emoji
Emoji category icons	✗ SVG only	✗	△ custom	✓ system emoji
AUD currency formatting	✗	✗	✗	✓ localised
Net worth dashboard widget	△	✗	✓	✓
Mortgage / equity tracker	✗	✗	✗	✓ unique
Superannuation projections	✗	✗	✗	✓ unique
Touch target ≥ 44px	△ varies	✓	✓	✓ enforced

This design meets or exceeds all top Figma PFM templates on core patterns, and adds three uniquely Australian features (AUD formatting, mortgage tracker, super projections) that no commercial template offers.

UX Principles to Apply

The six non-negotiable rules from 2025/26 PFM research, applied to the redesign.

Glanceability first

The dashboard must answer "how are we doing?" in under 3 seconds. Key numbers must be visible without scrolling. Use the hero card + 4 KPI chips pattern.

Friction-free entry

Adding a transaction must take <20 seconds on mobile. Correct input types, smart defaults (today's date, last-used category), and a persistent FAB are essential.

Traffic-light signals

Green / amber / red colouring on budgets removes cognitive load. Users shouldn't need to calculate — the colour tells them the story instantly.

Consistent card language

Every section uses the same card padding, radius, and border treatment. Visual consistency builds trust — critical for financial tools.

Mobile-first, not mobile-only

Design for 360px first. At 768px+, switch to a two-column layout (nav sidebar + content). Charts expand on desktop. The experience should delight on both.

Numbers deserve respect

Monospace font for all amounts. Consistent AUD formatting (\$ symbol, 2 decimal places, thousands separator). Numbers misaligned or inconsistently formatted signal amateur software.

Next Step

Use this design system to rebuild [charnley-finance.html](#). Replace the current tab navigation with a mobile bottom nav, adopt this token set (copy the CSS variables above), and rebuild each section as a card with the patterns shown in this document.

1. Apply CSS tokens
2. Rebuild navigation → bottom tab
3. Convert dashboard to card grid
4. Apply traffic-light to budgets
5. Switch amounts to DM Mono
6. Add FAB for transaction entry
